

Field Work is Not a Spreadsheet.

Stop duct-taping your operations. Start commanding them.

Most software handles the "sale" just fine. But once the deal is signed, the chaos begins. Email threads bury site plans, RFIs vanish into inboxes, and field crews are texting updates that never reach the office.

FieldServiceIQ was built for the way contractors actually work. We don't just track projects; we provide operational control from the first signed deal to the final inspection.

Built for Scale, Not Per-Seat Penalties

Most platforms punish you for growing. We don't. FieldServiceIQ offers unlimited contractor access so you can scale your workforce without scaling your software bill.

Control & Approvals

- ✓ **RFI & Submittals:**
Track priorities & due dates.
- ✓ **Document Control:**
Version-controlled drawings & specs.
- ✓ **Secure Public Links:**
Get approvals without making users log in.

Field Visibility

- ✓ **Smart Scheduling:**
Drag-and-drop with conflict detection.
- ✓ **Route Optimization:**
Territory management and map-based views.
- ✓ **Live Photo Uploads:**
Real-time visual updates from the field.

Total Alignment

- ✓ **HubSpot Integration:**
Bi-directional sync for sales & ops.
- ✓ **Contractor Network:**
Performance insights and skill tracking.
- ✓ **Smart Alerts:**
Configurable notifications for every milestone

The End of "Version Confusion"

Stop guessing who approved what or which drawing is current. FieldServiceIQ completes your tech stack by acting as the Command Center for your field operations.

Live Job Creation: Transition from "Closed-Won" to "Active Job" instantly.

Automated Versioning: Site plans are numbered and supersessions tracked.

Legally Defensible Trails: Every RFI, submittal, and approval is time-stamped.

Contractor Precision: Subcontractors see only their assigned work—nothing more.

Transparent, Flat-Rate Pricing

No "per-user" surprises. No hidden tiers. Just predictable costs for serious growth.

Platform Subscription

\$1,500 /month
